ANNUAL QUALITY ASSURANCE REPORT 2008-2009

PART A

Planning becomes inevitable in any part of an organization as it gives an opportunity to grow in multitudes. To improve the quality in educational institutions, planning has to be implemented as part of every year's agenda.

With IQAC as the center of development programs, our college after getting its reaccreditation with "A" grade has taken steps to develop the quality of education in higher studies.

The following are the identified areas where planning can be worked out:

- ❖ Launching of new courses with the future need and the students' interest in mind.
- ❖ Adding infrastructure to already existing traditional courses.
- ❖ Proper designing of the skill based courses.
- ❖ Giving students an environment where they can learn what is the need.
- ❖ The university also gives its suggestions for Choice Based Credit System from the coming academic year which would definitely give room for student centered learning.
- ❖ Teachers are to be encouraged to upgrade themselves – registering for their research, participation in seminars, conferences, symposiums, refresher courses and orientation programs.
- ❖ Encouraging teachers to apply for Projects both Minor and Major levels with the support of UGC and other agencies.
- ❖ With the same agencies, they can get assistance to organize seminars and conferences.
- ❖ With ongoing active research process, the centres of Research may handle viva-voce sessions inside the campus itself.

PART B

1. Activities reflecting the goals and objectives of the institution:

- Many activities were taken place during the academic year reflecting the goals and objectives of the institution.
- Many extension activities were taken to mitigate the rural – urban divide.
- Schemes for women empowerment were carried out.
- Every step was taken to incorporate the spirit of excellence in every academic and allied activity so that the quest for excellence is sustained.
- The Management has come forward with new initiatives to promote research among the staff members and scholars like financial assistance, free internet access, e-journal facilities, etc.,
- To develop harmony and culture amidst the student community, the Management extends its all support to College Fine Arts Club. This would also lead the students to involve in extra curricular activities.

2. New academic programmes initiated (UG and PG):

B.Com E-Commerce:

A three year job oriented UG degree course in E-Commerce has been introduced in the Department of Commerce to impart high-end knowledge in paperless exchange of business information using electronic – data interchange (EDI).

Certificate / Diploma / Advanced Diploma Course in Internet and Web designing:

An add-on course for three years in Internet and Web designing has been offered in the Department of Computer Science to educate the students in developing highly optimized graphics for the web. This programme helps the students to gain more knowledge in the process of conceptualization, planning, modeling and executing electronic-media-content delivery via internet. UGC has sanctioned a one time grant of Rs.7 lakhs for the above course.

M.Sc. Bio-Engineering:

A multidisciplinary two-year PG course in Bio-Engineering has been introduced by the college with the financial assistance of Rs.50 lakhs from the UGC. The aim of the

course is to develop the skills of the biology students in the application of engineering principles to address the challenges in the field of biology and medicine.

M.Phil Tamil :

A one Year Pre-research programme has been offered by the Department of Tamil with a view to provide ample opportunities for the students to carry out research in traditional arts and contemporary literature in Tamil.

3. Innovations in curricular design and transaction:

Implementation of Choice Based Credit System (CBCS) :

The conventional teacher-oriented education system has been replaced by the student centered choice based credit system by the Government of Tamilnadu. Some of the salient features of this system are mentioned below:

1. CBCS aims at standardizing the degree courses at the international level, by prescribing a new method of evaluation through 'Credit System'.
2. The system offers job oriented curriculum and a socially relevant education.
3. CBCS gives paramount importance to collaboration between Industry and University, Industry and College and even suggests practical training in nearby industrial units as part of curriculum, which should be done through "memorandum of understanding" (MOU).
4. It has scope for more interdisciplinary subjects, takes care of students who excel in Sports, NCC, NSS etc in a special way by awarding credits for these activities.
5. CBCS gives importance to value-oriented education involving ethics, human rights, moral instruction, social consciousness and village development.
6. The student may enjoy a good deal of freedom in choosing their own curriculum to fulfill their needs.
7. The student will be allowed to register for 8 credits for non-major electives, including language courses other than Tamil and English courses of his/her choice in the under graduate programme, and this is left completely to the student and his/her advisor.

PART C

Executing a plan is very essential in any concern and it needs to be reviewed at different stages. The feedbacks to be collected from those who are at the receiving end and every return has to be weighed and taken action on it. The developmental activities are to be looked at in a peculiar way since those are necessary in any growing situation. The year plans are to be considered for what such where planned and were the plans devised and what was the finance planned to be invested and also the work force employed for the execution of the same. Every year such a plan is essential to decide the future action. Of course these can be done only with the support of University Grants Commission and its financial contribution, other Governmental agencies like CSIR, DST, apart from the contribution of the Management.

FUTURE PLANS

- To avail more number of FDP from UGC for the benefit of staff members.
- To encourage staff members to go abroad for their upgradation in their respective fields – like Post Doctoral research with the support of Management. They will have to be relieved on such matters.
- Since the contribution of articles to the Journal College Sadhana is raising high, a plan of making it into two – Science and Humanities – is in move.
- To launch courses for the benefit of students who need not go to distant places for the higher studies like M.Phil. programme in the Department of Management Studies.
- Motivate the staff members to apply for Major and Minor Research Projects for various funding agencies.
- Placement cell will be activated to conduct more number of campus interviews and make the students fit for the job. Modernisation has to be done in that cell which would easily reach the global scene easily.
- To strengthen the Management Studies department by organizing many programmes.
- To upgrade the college library by making digitalized.
- To organize inter disciplinary seminars. In that the Foreign Experts can be invited to share the knowledge and interact.

- To conduct special coaching classes to train the students for NET, SLET examinations. Such may be extended with other fields also like TOEFL, ELTS, GATE and so on.
- To develop a herbal garden in our campus.
- To organize seminars by giving international exposure.
- To release a IQAC news bulletin.
- To apply for the fund from UGC to develop the IQAC cell.
