Master of Philosophy (M.Phil) Programme Outcomes (POs)

The Master of Philosophy (in both science and humanity), is a post PG research programme consisting of course work and an independent research project. The Programme Outcomes (POs) of M.Phil., includes the critical thinking, research problem identifying, proposal writing, systematic research approach, independency in research activities and efficient communication.

PO 1- Critical Thinking and Intellectual Exploration: Enhancing the ability to think critically and explore the intellectual and analytical skills towards the research challenges, which enable them to equip themselves as scholars.

PO 2- Research Problem Identifying: Exploring the multi-disciplinary subject expertise to identify the research problems to perform an effective assessment and to provide the solution for scientific and societal issues.

PO 3- Proposal Writing: Adequate knowledge in writing research proposal and the execution strategy with well defined milestones.

PO 4- Systematic Research Approach: Understanding and integrating methodologies and techniques of research at an advanced level and also enhancing the ability to work on the multi-disciplinary platform.

PO 5- Independency in Research: Capability in executing independent, innovative, high-impact and leading edge research tasks and accomplishing the proposed milestones.

PO 6- Effective Research Communication: Ability to write research report/ thesis, communicate the key research outcomes to peer reviewed journals and present their work in conferences, seminars and workshops at national/ international levels.
